

## Technician Apprentice

Formed in 1999, CSI is an established manufacturer of wound stainless steel tube products and stainless steel tube accessories. The business has consistently been profitable and continues to grow.

We are looking for an **Apprentice Technician** to join our busy manufacturing facility in Thetford. Reporting directly to the Managing Director who will set out your duties.

We offer a qualifying Engineering technician (Level 3), under which you will be trained by the Company as a Quality Technician. You will be required to attend a course run by West Suffolk College and will be released from your duties to attend college to your apprenticeship and attain the relevant qualification.

**Hours:** Monday to Friday 08:00 to 16.00 (Reduced working hours for under 18 years) 30 minute daily paid break.

**Salary:** £280 per week (pro rata for reduced hours)

### **Job Responsibilities:**

Follow the Company's Policy & Procedures. Health & Safety awareness of self and those around you.

Able to read CAD drawings and their translation to the inspection requirements of incoming materials, parts, finished components and our manufactured products.

Inspection and the use of measuring tools and equipment

Monitor production quality.

A knowledge of ISO2015: 9001 quality standards.

Conduct internal audits of the Quality Management System

To comply with reasonable instruction from your Line Managers and or the Directors

### **We offer:**

25 days holiday per year, plus statutory holidays

Pension Scheme

Life Insurance Scheme

Personal Protective Equipment & Company Uniform

The successful applicant will have the opportunity to develop their knowledge and skills in an engineering business. On successful completion of the apprenticeship the individual will take up a full time role as Quality Technician.

You will be a practical thinking person who enjoys problem solving and being hands-on.

You will have an interest in understanding how we make our products, be confident in working on your own, whilst also enjoying being part of a bigger skilled team.

You will be comfortable with speaking to and dealing with a wide range of people daily, production operators, maintenance engineers, customer and members of the company's management.

Early August 2021 induction to the business and its manufacturing processes, starting the college course in September 2021
